

The Spa Cover
You've Always Wanted.
The Last You'll Ever Need.

SMARTOP ®
by Leisure Concepts

How and why Smartop was developed

Since the invention of the hot tub in 1960, spas have evolved throughout the years. Evolution came in the way of hydro jets, heaters, lights, music systems, acrylic shells, plastic spa cabinets, wireless controls and more. The one component that hasn't evolved over time is perhaps the most critical – the spa cover. The spa cover protects the acrylic shell from harmful UV rays, prevents dirt and debris from entering and contaminating the water and holds heat in the water, which aids in controlling the spa's energy usage.

In 2012, I unveiled the very first Smartop with the intent of providing spa owners an alternative to the proven-to-fail vinyl cover. Since that first design I have continuously and diligently worked to improve the design and performance to what Smartop is today - an aesthetically superior, long-lasting and the highest-performing option in the spa cover market. Smartop is designed to work on new spas or serve as a replacement cover when it's time to replace the waterlogged, too-heavy-to-lift vinyl cover. Smartop is the cover YOU expect, the hot tub cover YOU deserve and the last cover YOU will ever need.

Smartop succeeds where others fail

The traditional vinyl cover has an average life span of three years. The Smartop was designed using outdoor rated components that are repairable and replaceable – therefore allowing Smartop to have an indefinite lifespan while offering many benefits to the spa owner experience.

Performance Guarantee

Exclusive DecoShield layer gives aesthetic superiority and an additional layer of protection against everyday elements.

Rigid polymer panels provide structural support while individual chambers filled with non-water absorbing Owens Corning foam hold heat in.

Non-corrosive anodized aluminum trim available in either black or silver.

Steel cable locking system secures the spa against unauthorized use.

Patented, exclusive EAS Lift & Assist makes the cover feel feather light during opening and closing.

Deckmount Kit *(Optional)*

The Deckmount Kit allows Smartop Upright to be installed on spas that are recessed into the deck or ground by allowing the bracket to be mounted to a flat, horizontal surface rather than the vertical sidewall of the spa cabinet.

Patent No. 8,813,275 | 9,689,172

Smartop Upright

Creates Privacy and Wind Block

The Smartop Upright creates a private, peaceful hot tub experience with its unique design that allows the cover to act as a privacy screen and wind block when in the open position. Smartop's patented EAS Lift and Assist component allows fingertip opening and closing of the front half of the cover. Requiring just six inches of clearance behind the spa, Smartop Upright is the perfect solution for limited space situations.

Smartop Vanish XL

When an open view is the priority

The sleek, streamlined Smartop Vanish XL lift system is designed to place the cover in a low-profile position behind the spa while gas shocks and patented EAS Lift and Assist system make the cover fingertip light when opening and closing. Requiring just 24 inches of clearance behind the spa, the Smartop Vanish XL allows open viewing to enjoy your beautiful setting.

Smartop Swim Spa

The Only Cover Strong Enough

Smartop Swim Spa can be made for swim spas up to 22 feet in length. The integrated cover lift system with the exclusive EAS Lift and Assist component enables easy opening and closing using a series of hydraulic shocks that assist with the lifting process. The unique overlap seal between the two covers creates a tight seal that keeps the heat in while keeping dirt and debris out. Smartop Swim Spa can be ordered in either the Upright, Vanish XL or a combination of the two.

Every Smartop is custom made

Every Smartop spa cover is custom made 100% in the USA per your design selections. Unique cover dimensions, corner radius size, insulation level plus color and trim options result in a spa cover that fits your spa properly and complements your spa's surroundings.

DecoShield

DecoShield is an elegant, textured polymer overlay that provides an additional layer of protection against even the harshest elements. The exclusive color choices and patterns bring style and sophistication enhancing the overall look of the spa and its surroundings.

SmartShield 800

For those environments where maximum heat retention is of the highest priority – the *optional* SmartShield 800 is the answer! Applied to the bottom side of the Smartop, SmartShield 800 has proven to increase the already energy conscious cover by more than 20%. This dense material is soft to the touch and serves as an added layer of insulation and assists with trapping heat in the hot tub.

Maintenance-Free

Smartop is maintenance-free and requires no costly surface treatment or conditioning. The durable polymer panels and DecoShield overlay are fast and easy to clean using dish soap and water. No stitched seams to treat or foam to flip makes Smartop effortless to own.

Safe & Secure

Smartop's steel cable lock system with a supplied combination lock provides safety and security while preventing unauthorized use.

Non-Absorbing Foam

Smartop is insulated with Owens-Corning closed cell waterproof foam, making it impermeable to water weight gain which eliminates sagging and water puddling. Smartop is sanitary and clean and will not develop mold, mildew or odor.

Built Strong

Smartop has been tested to support in excess of 1,000 pounds via its aluminum channel skeleton. This design protects against accidental breakage caused by children, animals, tree limbs and other outside factors.

Weather Resistant

Made from weather proven materials designed to stand up to extreme heat, cold, snow, pounding hail and intense UV rays, Smartop will maintain its look and style for years on end.

Cost & Energy Savings

Smartop's heat retention capability (R-value) has been tested against, and proven equal to the highest-rated vinyl cover. Unlike traditional covers, Smartop maintains the R-value throughout its lifespan due to the insulation never absorbing moisture and water, resulting in significant heat retention and cost savings.

Eco-Friendly / Environmentally Conscience

Different than traditional vinyl covers that are adding to our landfills at a record rate, Smartop is designed to never need replacing thereby giving worldwide green efforts a lift.

Performance Assurance Guarantee

Every Smartop spa cover is made using superior materials and craftsmanship by skilled men and women in the USA who take pride in their work. We are pleased to provide a three-year Performance Assurance Guarantee unlike any other cover warranty in the industry. We are proud of the product we have designed and manufactured and want you to be as well.
