

## Design/Build Sheet

This form has been designed to ensure you have all of the information required to place your Smartop order.  
**THIS IS NOT AN ORDER FORM. ALL ORDERS MUST BE PLACED DIRECTLY WITH A SMARTOP SPECIALIST  
 BY CALLING 888-965-6694.**

**Please provide the following information regarding your spa:**

Brand of Hot Tub: \_\_\_\_\_

Hot Tub Model: \_\_\_\_\_

Hot Tub Model Year: \_\_\_\_\_

Is your hot tub recessed into a deck or the ground? Yes No

**Using the detailed instructions provided, please enter the following information:**

Measurement A: \_\_\_\_\_ in.

Measurement B: \_\_\_\_\_ in.

Measurement C (Fold Length): \_\_\_\_\_ in.

Measurement D (Corner Raddius): \_\_\_\_\_ in. (See Measuring Guide provided)

Measurement E (Acrylic Height): \_\_\_\_\_ in.

Control Panel Depth (if applicable): \_\_\_\_\_ in. (See Wedge Diagram provided)

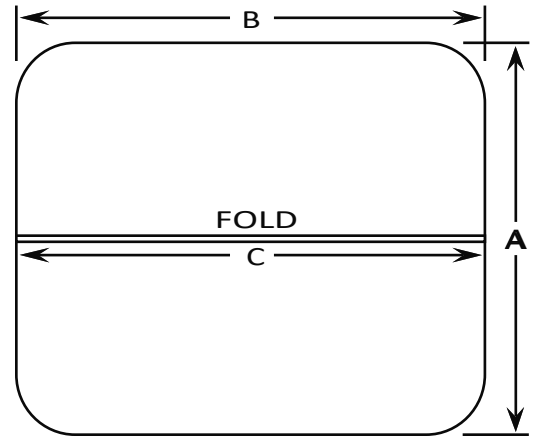

### CUSTOMIZE YOUR SMARTOP - Circle your desired options

What model of Smartop are you interested in?	Upright SwimSpa Upright	Vanish SwimSpa Vanish	
Choose your Deco Series color:	Black Portobello	Pepper Grey Bamboo	Grey Tweed Brown Tweed
SmartShield 800 (Enhancement Option):	Black		
Following are the Standard Trim color combinations. Please advise if you prefer an alternate color to that which is listed:	<u><b>Deco Color</b></u> Bamboo Black Brown Tweed Grey Tweed Pepper Grey Portobello	<u><b>Trim Color</b></u> Silver Silver Black Black Black Silver	

## Measuring Guide

### Measuring for A,B & Fold Length:

A, B and fold length measurements are in inches, rounded up to the nearest 1/2 inch increment. A spa cover that is a little larger than the acrylic shell will fit well, but a cover that is too small will be tight or may not fit at all. Dimensions must be taken from the outside of the acrylic spa shell (rather than the old cover).

### Measuring the height of the acrylic:

The height of the acrylic on your spa is measured in inches, rounded up to the nearest 1/4 inch increment. Measure the distance from the top of the acrylic on your spa to the bottom of the acrylic on your spa as shown in the illustration to the left.

### Measuring the depth of the Control Panel:

If the orientation of the Smartop on the spa requires the fold to intersect the control panel acrylic indentation, the depth of the control panel acrylic indentation must be identified so the wedge can be properly placed during the manufacturing process to allow a proper seal with the acrylic of the spa.

- Measure from the outer most edge of the acrylic on the outside of the spa to the outer most edge of the acrylic indentation around your control panel on the inside of the spa. If this measurement exceeds 5 inches, you will need a "double wedge" to be installed on your Smartop during the manufacturing process.

## Corner Radius Measuring Instructions

The radius is the measurements of a spa's rounded corners. There are two methods for obtaining the corner radius measurement:

### Option 1) Carpenter Square

Place a carpenter's square on the outside corner of the spa. The distance between the square's inside corner and the point where it touches the spa's corner is the radius. The image shown to the right indicates a corner with a radius of 6 inches.

### Option 2) Curve Templates

To use the curve templates included with this Measuring Guide, verify pages were printed in a portrait layout on 8.5" x 11" at Actual Size. (Printing Actual Size is critical as any alterations to the image could result in inaccurate measurements and a Smartop that does not fit properly. Smartop does not take responsibility for measurement accuracy/inaccuracy). Once the curve templates have been printed, follow these simple steps:

1. Using scissors, cut out the curve template that most closely matches the radius of your spa's corner (all corners on your spa will have the same radius therefore you will only need to measure one corner).
2. With the existing spa cover in the open position, line up the OUTSIDE edge of the cut-out template with the OUTSIDE edge of the spa's corner so they are flush. If the template is not flush with the spa's corner, try other templates to find the one that most closely matches the shape of the outside edge of your spa's corner.
3. Spas having a radius greater than 8" will require utilization of the two-part template provided. Simply cut out both corresponding pieces of template, bring the two ends together so the dashed lines match and tape the two pieces together. Proceed to align the template with the outside edge of your spa's corner as detailed in step 2 above.

#### Please use the following guidelines when selecting the proper corner radius:

- If your spa's corner radius measures 4" or less, please select the 2" corner radius.
- If your spa's corner radius measures 5" to 7", please select the 6" corner radius.
- If your spa's corner radius measures 8" to 9", please select the 8" corner radius.
- If your spa's corner radius is close to or measures exactly 10", please select the 10" corner radius.
- If your spa's corner radius measures 11" to 12", please select the 12" corner radius.
- If your spa's corner radius exceeds 12", please contact us at 888-965-6694.

**We have created a "How to Measure" video that takes you step by step through the corner radius measurement process. This video can be viewed at [smartopspacover.com/gallery/videos/](http://smartopspacover.com/gallery/videos/)**
