by Leisure Concepts

Smartop Succeeds Where Other Covers Fail

For over forty years, the industry standard in spa covers has been the vinyl-wrapped, foam-core design. While exterior materials have evolved, the core structure remains largely unchanged. Unfortunately, all foam-core variations share a common flaw—they absorb moisture over time. As the foam becomes waterlogged, it loses insulation (R-value), harbors bacteria, and grows excessively heavy, leading to sagging and eventual collapse into the spa. This cycle results in costly cover replacements every three to five years.

Smartop changes everything. Designed to be sleek, durable, and effortless to operate, Smartop is the only spa cover that's completely maintenance-free and built to last—delivering the worry-free spa ownership experience you deserve.

The Spa Cover You Deserve

- No maintenance
- Zero water absorption
- Easy to operate
- Durable and strong
- Exclusive heat retention system
- Safe and secure
- Attractive woven PVC skirt

The Difference

Non-Moisture-Absorbing Foam

The cover features specially designed non-moisture-absorbing foam that prevents weight gain, heat loss, and the growth of mold and mildew, which can lead to unpleasant odors.

DecoShield Protective Overlay

DecoShield is an elegant woven PVC overlay that provides both style and protection to Smartop's rigid exterior shell. This durable, weather-resistant material is designed to withstand extreme temperatures, snow and ice, heavy hail, intense UV rays, and more.

Auto Snow and Ice Melt

Smartop's exclusive design allows heat from inside the spa to transfer to the top of the Smartop, causing the snow and ice to melt ensuring easy access to your spa during the winter months.

Maintenance-Free

DecoShield makes cleaning your Smartop quick and easy with soap and water, eliminating the need for costly specialty cleaners and protectants.

UL certified to ASTM F1346-91 (Reapproved 2010)
Standard for Manual Safety Covers

nce Defined

Durable and Strong

Engineered for strength, our innovative design features interlocking polymer panels, a sleek aluminum top cap, and robust internal aluminum support channels. This combination delivers unmatched durability and strength, supporting over 800 pounds.

Unmatched Heat Retention

Independent third-party tests demonstrate that Smartop's heat retention capability, known as R-value, is equal to or superior to that of other top-rated covers on the market and will maintain this capability throughout its lifespan.

Dual Cover Lift System

The patented EAS Lift & Assist system includes integrated lifters on both the front and back of the Smartop, designed to improve user experience by allowing smooth and easy opening and closing of the cover.

Safe and Secure

With Smartop's easy-to-use Surelock cover lockdowns with combination padlock, you can have peace of mind knowing your spa is safe from unauthorized access.

Repairable and Replaceable Components

In the event of damage, Smartop's fully repairable and replaceable components mean you'll never need to invest in an entirely new cover—saving time, money, and frustration.

For extremely cold climates where maximum heat retention is of the highest priority - SmartShield is the answer! Applied to the underside of the Smartop, this dense, soft-to-the-touch, black material has proven to increase the already energy-conscious Smartop by more than 20%. (Extra fees apply)

Patent No. 8,813,275 | 9,689,172

Smartop Upright

Effortless Operation.
Elegant Design.
Space-Saving Performance.

The Smartop Upright is the perfect solution when space is limited behind the spa, or you want a privacy and windscreen to create your own personal oasis. The patented design ensures smooth movement and a lightweight cover that is easy to open and close.

- Suitable for spas that measure 120 inches or less
(For spas larger than 120 inches, explore the Smartop Swim Spa model)
- Vertical positioning maximizes privacy and minimizes space usage
- Built for lasting performance and effortless use
- Optional Deckmount kit available for use with recessed spas

As few as 8 inches is required behind the spa and 3 inches on each side

Patent No. 9,574,361 | 9,689,172

Smartop Vanish XL

Clear Views.
Clean Design.
Easy Operation.

The Smartop Vanish XL masterfully blends innovation and style to elevate your spa experience. This sleek, low-profile cover drops into a low position behind the spa, preserving your view and allowing you to fully experience the beauty of your surroundings. Engineered for smooth, effortless operation, the Vanish XL is user-friendly for everyone—making every soak relaxing from the moment you open your spa.

- Suitable for spas that measure 120 inches or less
(For spas larger than 120 inches, explore the Smartop Swim Spa model)
- Cover rests low for an unobstructed open view
- Durable construction for long-lasting performance

A minimum of 28 inches is required behind the spa and 5 inches on each side

(one Upright, one Vanish XL)

Smartop for Swim Spas

Effortless Handling. Exceptional Design.

Smartop for swim spas eliminates the struggle of lifting heavy covers, thanks to our patented EAS Lift and Assist System. With smooth, one-person operation, you'll spend less time wrestling with your cover and more time enjoying your spa. Experience effortless luxury every time you use your swim spa.

- Select from three sophisticated models: Upright, Vanish XL or the versatile Hybrid (one Upright, one Vanish XL).
- Perfectly engineered for swim spas measuring 121 to 240 inches.

Patent No. 8,813,275 | 9,574,361 | 9,689,172

The exclusive center bridge design where the two covers meet, creates a tight seal that holds the heat in while preventing dirt and debris from entering the swim spa.

Proudly Made in the USA - Every Smartop is expertly crafted using premium materials and precise engineering to deliver exceptional performance and long-lasting reliability. Manufactured and assembled entirely in the U.S., each cover undergoes strict quality control and careful inspection at every stage of production—ensuring unmatched craftsmanship and consistency. By manufacturing domestically, we support local jobs, uphold high production standards, and provide spa owners with a product they can trust—backed by American innovation and pride.

Built Just for You – Each Smartop is custom-made to your exact specifications. Simply provide your spa's dimensions, corner radius, acrylic height, and preferred model, and we'll create a cover that fits perfectly—adding both elegance and functionality to your spa.

Have a uniquely shaped spa or special installation requirements? No problem. Our team will work with you to design and build a Smartop tailored specifically to your needs.

Smartop Performance Versus Other Covers

For over four decades, the spa industry has relied on the same standard: a vinyl-wrapped, foam-core cover. While outer materials have evolved, the internal foam-core design remains virtually unchanged—and inherently flawed. All versions of these covers eventually absorb moisture, becoming waterlogged, heavy, and a breeding ground for bacteria. As the insulation becomes saturated, heat loss increases, the cover begins to sag or collapse into the spa, and costly replacements are required every three to five years.

Smartop was engineered to solve every one of these issues. Its advanced design features rigid polymer panels that encapsulate non-absorbent foam, eliminating water retention—along with the heat loss, mold, mildew, bacteria buildup, and foul odors that come with it. The result: a clean, dry, sanitary cover that performs consistently over time.

A stylish DecoShield woven PVC outer layer enhances durability and aesthetics while requiring only minimal maintenance—just a quick clean with dish soap and water.

Built to outperform and outlast all other covers, Smartop's core structure combines high-strength polymer panels with interior aluminum support channels and an exterior aluminum frame. This unique design provides unmatched strength—supporting up to 800 pounds—while maintaining a sleek, contemporary appearance.

And with Smartop's patented dual lift-assist system, operating the cover is virtually effortless—making it the most user-friendly spa cover on the market.

In short, Smartop is the ultimate spa cover: beautifully designed, energy-efficient, maintenance-friendly, and built to last a lifetime.

Smartop Cares About the Environment

Every year, more than a million traditional foam covers are discarded, which is a cause of concern as the foam material used in these covers is non-recyclable and non-biodegradable. As such, the disposed-of covers must be placed in landfills. Studies show that the foam material can take up to 500 years to decompose, resulting in a significant strain on the environment. Below are some additional alarming facts about the foam used in traditional foam-filled covers and its impact on the environment:

- 25-35% (by volume) of landfills are comprised of polystyrene foam products (about 10 cubic ft. of volume taken up for every 10,000 cups in landfill)
- 80% of extended polystyrene foam ends up in landfills and much of the remaining 20% in waterways (as per U.S. Environmental Protection Agency: 3 million tons of polystyrene foam is produced in the U.S per year; 2.3 million tons end up in landfills, with much of the remainder finding its way into waterways).
- 18% of total coastal clean-up costs are attributed to polystyrene foam products.

Smartop is the only spa cover designed and built as a non-disposable cover, making Smartop not just a smart choice, but the responsible choice as well.

Three-year Manufacturer Performance Assurance Guarantee

If your Smartop is determined to be unserviceable due to defects in materials or workmanship within three (3) years from the date of purchase, the manufacturer will, at its sole discretion, provide either replacement parts or a replacement cover.

About Leisure Concepts

Leisure Concepts has been providing hundreds of thousands of satisfied homeowners quality products for over 25 years, making the company the #1 spa accessory manufacturer in the world. All manufacturing is completed in the USA in our 100,000 sq. ft. state-of-the-art facility allowing the strictest quality control and on-time delivery. Our goal is to provide quality products that offer many years of trouble-free ownership and 100% customer satisfaction. Review full details of the Performance Assurance Guarantee at
