

The Difference Defined

Non-Absorbing Foam Core Technology

Smartop is constructed with advanced, non-moisture-absorbing foam that resists waterlogging and maintains consistent insulation. Unlike traditional foam cores, it helps prevent the growth of mold, mildew, and odors—keeping your cover cleaner, lighter, and performing like new for years.

Built to Support Extreme Weight

The innovative design features interlocking polymer panels, robust internal aluminum support channels, and a sleek aluminum top cap. This combination delivers unmatched durability and strength, easily supporting over 800lbs.

Elegant Overlay. Extreme Protection.

DecoShield is an elegant woven PVC overlay that provides both style and protection to Smartop's rigid exterior shell. This durable, weather-resistant material is designed to withstand extreme temperatures, snow and ice, hail, intense UV rays, and whatever mother nature delivers.

Easy Care. No Extra Effort.

Smartop is virtually maintenance-free. Soap and water are all it takes to keep it clean—no special cleaners or costly maintenance required. Durable, simple, and designed to make spa ownership easy.

Smooth and Effortless Cover Operation

Smartop's patented Lift and Assist System features lifters on the front and back halves of the cover, ensuring smooth, easy, and effortless operation for users of all sizes.

Secure Your Spa with Confidence

With Smartop's easy-to-use Surelock cover lockdowns with combination padlock, you can have peace of mind knowing your spa is safe from unauthorized use.

Heat Retention that Lasts

Independent third-party testing confirms Smartop's heat retention matches the highest-rated foam covers. Unlike traditional foam-wrapped covers that absorb moisture and lose insulating performance over time, Smartop's closed-cell, non-moisture-absorbing foam maintains consistent heat retention year after year, delivering dependable thermal efficiency for the life of the product.

End the Cycle of Cover Replacements

In the rare event of damage, Smartop's repairable and replaceable components ensure you never have to replace the entire cover—saving you time, money, and hassle. By eliminating the need for full cover replacements, Smartop also helps reduce landfill waste, keeping waterlogged foam covers out of the environment and offering a more sustainable, eco-friendly solution for spa owners.

Three-Year Manufacturer Performance Assurance Guarantee

If your Smartop is determined to be unserviceable due to defects in materials or workmanship within three (3) years from the date of purchase, the manufacturer will, at its sole discretion, provide either replacement parts or a replacement cover. Review full details of the Performance Assurance Guarantee at <https://www.smartopspacover.com/performance-assurance-guarantee/>

About Leisure Concepts

Leisure Concepts has been providing hundreds of thousands of satisfied homeowners quality products for over 25 years, making the company the #1 spa accessory manufacturer in the world. All manufacturing is completed in the USA in our 100,000 sq. ft. state-of-the-art facility allowing the strictest quality control and on-time delivery. Our goal is to provide quality products that offer many years of trouble-free ownership and customer satisfaction.

Smartop Cares About the Environment

Smartop is as kind to the environment as it is to your spa. Its long-lasting, water-resistant design reduces waste by eliminating the need for frequent replacements. Enjoy peace of mind knowing your choice is better for you and better for the planet.

SMARTOP 
by Leisure Concepts

Effortless to Use. Built to Last.

Smartop Succeeds Where Other Covers Fail

Traditional foam-wrapped covers absorb water, which diminishes their ability to retain heat and makes them heavy. Over time, these covers can sag into the spa, leading to mold growth and an unpleasant environment filled with odors and bacteria. These problems result in frequent and costly replacements, causing frustration for hot tub owners who are looking for a better solution.

Smartop's exclusive design effectively solves these issues by providing a cover that stays dry, lightweight, odor-free, and maintains heat retention throughout its lifespan.

More than just a cover, Smartop is a durable, low-maintenance investment that lasts longer than traditional foam covers, ultimately saving you time, money, and energy.

The Spa Cover You Deserve

- Zero water absorption
- Effortless operation
- Maintenance-free
- Durable and strong
- Safe and secure
- Exceptional heat retention
- Repairable and replaceable components
- Sleek, contemporary design

Smartop Upright

Patent No. 8,813,275 | 9,689,172

Space-saving design, total privacy.

The Smartop Upright is the perfect solution when space is limited behind the spa, or you want privacy and windscreen to create your own personal oasis. The patented design ensures smooth movement and a lightweight cover that is easy to open and close.

- Suitable for spas that measure 120 inches or less
For spas larger than 120 inches, explore the Smartop Swim Spa model
- Vertical positioning maximizes privacy and minimizes space usage
- Built for lasting performance and effortless use
- Optional Deckmount kit available for use with recessed spas

As few as 8 inches required behind the spa and 3 inches on each side

Smartop Vanish XL

Patent No. 9,574,361 | 9,689,172

Now you see it, now you don't.

The Smartop Vanish XL masterfully blends innovation and style to elevate your spa experience. This sleek, low-profile cover drops into a low position behind the spa, preserving your view and allowing you to fully experience the beauty of your surroundings. Engineered for smooth, effortless operation, the Vanish XL is user-friendly for everyone—making every soak relaxing from the moment you open your spa.

- Suitable for spas that measure 120 inches or less
For spas larger than 120 inches, explore the Smartop Swim Spa model
- Cover rests low for an unobstructed view
- Durable construction for long-lasting performance

A minimum of 28 inches required behind the spa and 5 inches on each side

Smartop for Swim Spas

Easy handling, on and off.

Patent No. 8,813,275 | 9,574,361 | 9,689,172

Smartop for swim spas eliminates the struggle of lifting heavy covers, thanks to our patented Lift and Assist System. With smooth, one-person operation, you'll spend less time wrestling with your cover and more time enjoying your spa. Experience effortless luxury every time you use your swim spa.

- Select from three models: Upright, Vanish XL or the versatile Hybrid (one Upright, one Vanish XL)
- Perfectly engineered for swim spas measuring 121 to 240 inches.
- Deckmount kit available for Upright models for use with recessed spas.

Upright Model

A minimum of 8 inches required behind the spa and 3 inches on each side

Vanish XL and Hybrid Models

A minimum of 28 inches required behind the spa and 5 inches on each side

Upgrade to SmartShield

Maximize heat retention.

For cold climates and for those who prioritize maximum heat retention, SmartShield is the perfect solution! Applied to the underside of the Smartop, this dense, soft-to-the-touch, black material has proven to increase the already energy-conscious Smartop by more than 20%. (Extra fees apply. Available for all models.)
